Tanmia Informatika

Professional Software Developer
2016

WORK EXPERIENCE

IT ENGINEER

BAJAU ESCORINDO / 2020 - 2024

As a System Engineer, I designed and implemented Workload Automation solutions, integrated workflows, and managed secure file transfers while ensuring compliance with security standards. I led patch management strategies, conducted risk assessments, and created scripts to automate tasks. Additionally, I participated in operational activities to enhance system stability and performance, collaborating cross-functionally to address challenges and optimize processes.

IT COORDINATOR

TORIN MULTI INVESTAMA / 2014-2019

As an IT Coordinator, I am an enthusiastic and dedicated IT professional with over 5 years of experience in IT coordination, support, and application development. I am skilled in planning IT projects, providing technical support, and communicating with stakeholders. I maintain IT systems and networks, perform technical and administrative tasks, and design procedures for effective IT resource use. I also develop, test, and maintain software applications to meet user needs. Additionally, I advise management on IT decisions, troubleshoot technical issues, track system performance, and participate in technical and operational meetings. I have a strong ability to work well in a team environment and possess extensive knowledge of both Windows and Linux operating systems.

WORK EXPERIENCE

RESEARCH SUPPORT & IT DEVELOPMENT

AAA SEKURITIES / 2012 - 2014

As part of my work experience, I provided comprehensive data support for the Research Analyst, developed applications, and implemented support systems for the Research Division. I was responsible for producing, monitoring, and disseminating research reports and data, while also analyzing information to support the division's needs. Additionally, I organized and stored data for future research projects and meticulously documented all data and research procedures to ensure accuracy and consistency.

IT SPECIALIST

ARJUNA RESOURCES / 2010-2012

I managed the daily operations of the IT department, developed new strategies and IT procedures to increase efficiency, and coordinated the needs of in-house IT experts and remote employees, vendors, and contractors. Additionally, I assisted with the installation of new hardware and software, and helped train employees on their use, ensuring a seamless integration of new technologies into the organization.

IT PROJECT OFFICER

JAKARTA REALTY (THAMRIN CITY) / 2009-2010

I assisted the Project Manager in monitoring and controlling projects, managed project status reports, issues, action items, risks, and both internal and external dependencies. I provided technical guidance and support to project team members, ensuring that project deliverables met quality standards and established best practices. Additionally, I managed project resources, including team members, vendors, and contractors, to ensure efficient and effective project execution.
